

/home/carla/git/ijengine
-ICG_GL/include/model.h

```
graph TD; A["/home/carla/git/ijengine<br/>-ICG_GL/include/model.h"] --> B["vector"]; A --> C["iostream"]; A --> D["GL/glew.h"]
```

The diagram illustrates a C++ header file's include directives. A central box at the top contains the file path and the include directive. Three arrows point downwards from this box to three separate boxes below, each representing an included file: 'vector', 'iostream', and 'GL/glew.h'.

vector

iostream

GL/glew.h
